

Special Topics: Data Analytics and Visualization in Healthcare
CSCI-GA.3033-096 (19635)
Lab assignment 2

Instructions:

Part I

- Perform data wrangling with R or Python for the dataset provided in week 3 (Clinic_Patients_messy.csv).
- Explain in a PDF/MS Word document the errors you found in the dataset and what steps you took to perform the data wrangling.

Part II

- Look for and download 1 healthcare dataset.
- Perform data wrangling with R or Python for that dataset.
 - It should have at least 5 data wrangling tasks.
- Explain in a PDF/MS Word document the errors you found in the dataset and what steps you took to perform the data wrangling.

Notes:

- This lab assignment is individual.
- You need to submit 3 files (the .R or Python file, the PDF/MS Word document, and the messy dataset you used in Part II).
- You are welcome to do this assignment in R and Python, but it is not required.
